

INNOVATIONS:

- Various types of academic and co-curricular innovations are experimented. A sketch of various activities for the year was narrated and asked the students for their wholehearted support.
- The children and parents are given awareness about the need to protect the nature. The environmental protection or conservation of water is explained to students with the assistance of role play and placards and green day celebration.
- We also conduct various interschool competitions to bring out the hidden talents of students, such as Debate, Educational Fiesta, Out reach programme, Yoga Day, Cultural Day, Independence Day, Annual Function etc.
- All the activities of the school are aimed at making the children a better citizen and an asset for themselves and the nation at large.
- Weaker students are given special mentors and classes.
- The availability of counselor help the students to overcome various difficulties.
- Children were also taught how to segregate the different types of wastes including the electronic waste.
- In order to cultivate an interest for the agriculture and gardening, small flower and fruit garden was set up.
